

How to clean the cooker hoods in the common kitchens.

- Fill the green plastic tub with enough water to cover the filters.
- Dose the detergent “grundrens/grundrengøring” to the water according to the dosage guide on the bottle.
- Remove the filters from the cooker hood and soak them in the water.
- Wring a cloth in the hot water with the filters and clean the cooker hood and spice rack.
- When the soaking has had enough effect, clean the filters with a brush, rinse and dry them.
- Reassemble the filters to the cooker hood.
