## **Important notice to the residents at Moltkesvej** **Implementation of cleaning control**

---

Due to an increase in lack of cleaning, in the common areas, the last couple of years, it is, unfortunately, necessary to implement cleaning control.

The decision has been made by the board of Ravnsbjerg Kollegiet in collaboration with the residents' council.

This agreement will become effective from the 3 of November. From November 17<sup>th</sup> a cleaning company will be hired to take care of any insufficient cleaning. The expense will be charged in accordance with the general guidelines attached.

The attached cleaning schedule will show who is responsible for the cleaning when the controls are carried out by the caretaker.

In the appendix, it appears which elements are checked and thereby also what should be cleaned before a cleaning control.

Any questions can be directed to the caretaker.

Best regards,
